

Continuum Assist Tech Advantage

PRODUCT DETAILS

Power transformation with custom project support with Continuum Assist Tech Advantage

IT for business is transforming at a blistering pace - from hybrid environments to SaaS. End clients need your support, but developing expertise for these evolutionary one-time client requirements simply does not scale. We can help you harness the opportunities presented by this change - with Continuum Assist Tech Advantage. With our breadth of seasoned experts, there are close to 100 project options to choose from including support for Microsoft Azure, Active Directory, VMWare, Office365, and more.

“We needed more experienced technicians to handle the highly-technical projects that were coming our way, or in some cases, more technicians to handle a spike in simultaneous projects that we didn’t have the headcount for. Tech Advantage was the perfect option for us.”

Eddie Phillips
COO, Shield Networks

Key benefits

Get the expertise you need

Our teams have the hands-on technical experience and capabilities to remove roadblocks to service expansion

Monetize transformation

Secure high value, custom projects across multi-infrastructure technologies as clients move workloads into new environments

Magnify customer loyalty

Execute on unique project requirements efficiently and reinforce long-term customer relationships

Bridge to new revenue streams

Capture post-project management services and expanded monthly recurring revenue
